EAGLE Tofino Central Management Platform -
EAGLE TofinoCMP, 50 Tofinos
942 016-050

Name		EAGLE Tofino Central Management Platform
		The EAGLE Tofino Central Management Platform (CMP) software enables configuration, management and monitoring of all your EAGLE20 Tofino Security Appliances from one workstation.
Delivery informations		
Availability		available
Product description		
Description		The EAGLE Tofino Central Management Platform (CMP) software enables configuration, management and monitoring of all your EAGLE20 Tofino Security Appliances from one workstation.
Type		EAGLE Tofino CMP, 50 Tofinos
Order No.		942 016-050
Diagnostics		
Diagnostic functions		Network model: Quickly and easily create a model of your entire control network. Security rules: Visually create rules that specify which device may communicate, and what protocols they may use. Passive Asset Discovery discovers computers and controllers, and matches them against a database of over 25 vendor product families. Security rules test: Security alerts are displayed in the Tofino CMP's Event View, enabling fast rule editing and refinement
Alarm and event actions		Security alerts are displayed in the Tofino CMP's Event View, enabling fast rule editing and refinement. Security alerts (heartbeats) may be relayed to syslog server (RFC 3164), enabling alerting of operations personnel via e-mail or pager. Heartbeats may be stored in a SQL database and/or text file for subsequent analysis.
Configuration		
Configuration functions		Configure, manage and monitor an unlimited number of EAGLE20 Tofino Security Appliances from one workstation. Built-in Network Editor to quickly model your control network. Visual drag-and-drop editors for quick and easy configuration of security rules. Pre-defined templates for more than 50 industrial communication protocols and over 25 families of industrial controllers.
User-settable options		n/a
Hardware requirements		
Network		Ethernet network with TCP/IP protocol stack
Recommended resolution		Minimum 1024 x 768
Hard disk space		250 GB free
RAM		1 GB
Processor		Dual-core CPU
Software requirements		
Network device		n/a
Operating system		Windows Server 2003 (tested), Windows XP SP2/SP3, Windows Vista
SCADA /Process visualisation		
Supported SCADA systems		Pre-defined templates for more than 50 industrial communication protocols and over 25 families of industrial controllers.
Protocols		
Supported protocols		n/a
Security		
Security functions		Network: uses secure SSH communications to configure each EAGLE20 Tofino Security Appliance. Manual: encrypted configuration files may be saved on an ACA-21 storage device and loaded into EAGLE20 Tofino Security Appliances via a secure USB port.
Authentication		n/a
Encryption		n/a
Filter		n/a
Product variants		
Version + Nodes		Full version
Approvals		
MUSIC 2009-1		Certified (Foundation Level)
Modbus-IDA		Certified Modbus compliant by Modbus-IDA
Scope of delivery and accessories		
Scope of delivery		Software download. License activation via email.
Accessories to order separately		Printed Installation Guide and CD-ROM with software and manuals. (Order-No. 942 016-001)
