1AC/1AC/750 VA uninterruptible power supply with integrated battery, lead AGM, VRLA technology, 24 V DC, 4 Ah for 230 V AC applications.

Product description

UPS modules with integrated battery are particularly space-saving: the UPS module and battery are combined in one housing. The TRIO AC UPS ensures seamless transition to battery operation thanks to the pure sine curve. Connected industrial PCs can be shut down safely via the integrated USB interface.

Your advantages

- Smooth transition, thanks to the pure sine curve: the sine generated in battery operation is synchronous with the mains previously used for supply
- · Space saving: Combination of UPS module and battery in the same housing
- · Long buffer times with integrated VRLA battery, can be extended with additional battery module
- · USB interface for connection to higher-level controllers such as industrial PCs
- · Startup from energy storage possible, even without mains input
